## **EMPLOYMENT**

**PMG, Boston**

**Software Engineer 2** June 2025 - Present

- Acquired Momentum Commerce in June 2025.

**Momentum Commerce, Boston**

**Software Engineer 2** April 2025 - June 2025

**Software Engineer 1** August 2022 - April 2025

- Engineered a new code deployment system leveraging Github Actions and AWS saving engineers a month of time.
- Developed internal tools to increase productivity for both commercial and technical teams.
- Built multiple front-end interfaces to facilitate customer data delivery in an easy and intuitive way.
- Rebuilt and optimized our competitor analysis to decrease the time it takes to run the operation from 45 minutes to under 1 minute.
- Worked with technical and non-technical stakeholders to drive innovation that provides both internal and external users with better insights into their Amazon data.
- Managed AWS stack using the Terraform Infrastructure as Code tool to programmatically and repeatedly deploy and maintain environments in EC2 and ECS.
- Helped implement better development and support practices to ensure better maintenance of code e.g.--using monthly sprints to better segment development tasks and the usage of a weekly rotating support engineer to aid internal and external users with bugs and other issues.

## **SKILLS**

- Proficient in programming in object-oriented and procedural programming languages, especially C, C++, Java, Python, JavaScript, TypeScript, and PHP.
- Advanced in Preact and proficient in AngularJS frontend frameworks.
- Advanced in Markup Languages such as XML, HTML, and YAML.
- Proficient in Relational Databases such as MySQL and Snowflake.

## **EDUCATION**

**Boston University, Boston**

August 2025

Master of Science, Computer Information Systems

**College of the Holy Cross, Worcester**

May 2022

Bachelor of Arts, Computer Science, Minor, Physics
